Web 2.0 Showdown: Ning vs. the Campus Portal In 2002 the Campus Computing Project survey reported that over two fifths of responding campuses had a portal in place or under development. By 2007, enterprise portals had passed through the “trough of disillusionment” in the Gartner Hype Cycle for higher education – at best, a necessary element of IT infrastructure; at worst, irrelevant. Why are established and emerging social networks replacing campus portals as primary information sites? What should campuses do to recoup the effort and money they have already invested in developing an enterprise portal? What does the proliferation of external networking sites mean for campus customer service initiatives?	Presenters/ Institutions Sabrina DeTurk <i>Saint Joseph's University</i>	Time / Room 09:00 - 10:00 Grande III	Cross List
SSO to Exchange Labs in Luminis IV La Salle University joined a growing list of Colleges and Universities choosing to outsource student email services. We chose Microsoft's Exchange Labs service for its robust platform, ease of use, and integration capabilities. Learn how we utilized Luminis IV CAS in conjunction with IIS to provide Single Sign On access to Microsoft Exchange Labs.	Melissa Miller <i>LaSalle University</i>	09:00 - 10:00 Pennsylvania	
A Portal Develops Immaculata University's portal, MyIU, has evolved in three years from a stand-alone portal to one today that serves more than 12,300 users and provides single sign on to BANNER and the ANGEL learning management system. Getting there was not always easy but today we are rich in content and have simplified access to our resources for the campus community.	Linda Jones Lisa Monk <i>Immaculata University</i>	09:00 - 10:00 Royale II

One good tab deserves another - Building Constituent Portals Ever wonder what other schools do with their portal? Looking for ideas on how to use the power of your portal to reach different audiences? This session will feature various portal tabs currently in use by Lehigh University constituents, including Students, Alumni, Parents and University Trustees. In 2003, Lehigh University began using the Luminis portal to reach out to incoming freshmen with an online pre-orientation experience replacing the three-day, on-campus pre-orientation program held in July each year. Since 2003, Lehigh has continually enhanced the First Year Student (FYS) portal and has developed portals for Admitted Students, Alumni, Parents and the University Trustees. Students offered admission to the class of 2010 were given access to a portal with channels to pay their deposit, register for events, contact current Lehigh students and chat online with other admitted students. Similar portals have been developed for graduate students in our College of Business and Economics. The Alumni portal allows graduates to retain access to email, library resources, group memberships, and campus information as well as access to the alumni online community. The Parent portal provides Lehigh parents with campus and community information as well as, with student authorization, access to their student's registration information and schedule, grades and financial aid information. The Trustee portal provides our Board of Trustee members with meeting materials, committee membership information, leadership updates, campaign information and general campus news. This presentation will discuss the content areas developed, the results of satisfaction surveys, the trials and tribulations of these projects, thoughts on how to improve the content development process, and future visions.	Debbie Feldman Sara Rodgers <i>Lehigh University</i>	1:40 - 2:30 Regency
