Lehigh University

Williams Hall

Tentative Agenda

8:30 - 9:00 AM	Check in and Breakfast
9:00 - 10:00 AM	Session 1 - General Session
10:15 - 11:15 AM	Session 2 - Concurrent Sessions
11:30 - 12:30 PM	Session 3 - Concurrent Sessions
12:30 - 2:00 PM	Lunch and Networking
2:00 - 3:00 PM	Session 4 - Concurrent Sessions

General Session

Argos 5.0 Overview & Roadmap
In this session we will demonstrate the new product enhancements available in Argos 5.0. Included in this release are the refresh of the Argos client and Web Viewer, improved user experience, and customer-based enhancements. We'll also discuss the Argos roadmap and future enhancements.

Concurrent Sessions (subject to change)

The Lehigh Argos Journey
Learn about Lehigh's implementation of Argos and where we are today. See some of the reports that have been created and the different processes used by each department.

Security Panel
Learn how different schools approached Argos security and the strategies used.

Meeting Dashboard Needs through OLAP
Learn how Lehigh's Advancement team is using OLAP features of Argos to meet the dashboard needs of users. From summary to detail to visualization . . . and easy to build!

An Introduction to Usability in Argos

As we create datablocks for self-service, we need to consider the usability of our dashboards for end-users. This presentation will introduce the rules of thumb that make forms more understandable and useful as well as less confusing for the less technically minded. Usability combines insights from cognitive psychology and design as well as library science and city planning. You will find that is not that hard to make a big impact. You will also learn why phone number used to have seven digits. Recommendations for further study will be included.

Scheduling on Steroids

Bursting, writing files to drives, attaching static documents, "reminder" emails.

Argos Case Studies

Argos has helped hundreds of institutions solve reporting and information access challenges. This session will go through examples from Letter Generation and basic reporting to Data Cubes and Dashboards. Using client examples you will see in this non-technical session how Argos can help you go beyond basic reporting and get access to the information you need.

Argos Advanced Tips and Tricks

Argos has many components and features that have not been discovered by a typical Argos knowledgeable person. This session will provide great technical tips and tricks from an Argos expert that are sure to improve any DataBlock Designer's game! Looking for some cool tips & tricks to take you and your organization to the next level then join us for this informative session.

Building a Dashboard

This session will cover creating a drill through Dashboard from scratch. We will show how to build a simple Dashboard from beginning to end.
