General Session

Evisions presentation on the latest product enhancements and the Argos roadmap.

Breakout Sessions (subject to change)

Adding Visualization to Your Operational Reports

Make your end user experience easier by adding charts and graphs that show a summary of the data. This session will focus on a mid-term grade report datablock that includes charts with drill-down capabilities all designed to process information faster and get to details quickly. We will discuss the initial report request and the development of the datablock to best suit the needs of the end user.

Drill-through Charts: A Hands-on Experience (Pre-registration required, BYOD)

Welcome to ARGOS, Lehigh's Finance and Payroll Reporting Tool.

As an alternative to using MS Access for Finance reporting, the ARGOS Finance and Payroll dashboard was designed to provide an easy way to view Banner account balances, transaction activity and payroll information. Paper reports distribution is a thing of the past!

Application Development in Argos: A Hands-on Experience (Pre-registration required, BYOD)

Set It and Forget It, Scheduling in Argos

Using the Argos scheduling functionality to automate manual reporting tasks.

Hackathon (Pre-registration required, BYOD)- 2 hour session

Closing Session and Hackathon Presentation

Hackathon team presentations and closing remarks.
